PROFESSIONAL SUMMARY

Frontend Engineer with 10+ years of experience building scalable web applications, component libraries, and accessible digital experiences. Specialized in JavaScript, TypeScript, Vue, Nuxt, HTML5, SCSS, and modern frontend architecture. Experienced in performance optimization, WCAG compliance, and browser-based game development using PixiJS and HTML5 Canvas.

CORE TECHNOLOGIES

Frontend

JavaScript, TypeScript, Vue, Nuxt, HTML5, CSS3, SCSS

Game Development

PixiJS, HTML5 Canvas, Game Systems, Asset Optimization

Tools

Git, Vite, Storybook, pnpm, REST APIs, AI-assisted development workflows.

Specialties

Accessibility (WCAG/ADA), Performance Optimization, Responsive Design, Component Architecture

SENIOR FRONTEND ENGINEER (EXPERIENCE TECHNOLOGY)

PGD | Dec 2025 – Jun 2026

FRONTEND ENGINEER

PGD | Nov 2015 – Nov 2025

- Engineered front-end component systems for large-scale Adobe Experience Manager (AEM) implementations across two major enterprise projects — building HTL/Sightly templates, Touch UI Dialog configurations, and Clientlib-managed CSS/JS pipelines for clients in banking, automotive, healthcare, and consumer brands.
- Led WCAG/ADA accessibility compliance across high-traffic digital platforms — establishing front-end accessibility standards, conducting

WEB DEVELOPER ANALYST

Accenture | Aug 2014 – Nov 2015

- Developed search functionality for a major US banking client, improving performance and preventing revenue-impacting issues.
- Streamlined agile workflows, improving team delivery speed.
- Collaborated closely with delivery, UX/creative, analytics/SEO, QA, and business teams — providing task estimates, progress updates, and technical documentation aligned with agency delivery standards.

FRONTEND DEVELOPER & DESIGNER

Pixels Juice | 2013 - 2014

- Designed interactive, visually appealing web experiences, blending graphics, frontend & web game development.

component audits, and delivering accessible markup patterns adopted across distributed engineering teams.

- Developed reusable component libraries and design system integrations enabling consistent multi-brand delivery across concurrent projects in cross-functional Agile/Scrum environments.
- Optimized frontend performance on enterprise production platforms through critical CSS, maintaining Core Web Vitals quality standards for global-scale digital experiences.

SELECTED PROJECTS

PORTFOLIO SYSTEM

Vue | Nuxt | TypeScript | SCSS | Gsap

- Modern frontend portfolio architecture focused on scalability, accessibility, and performance.

Source Code: jorchava.github.io

CONTRAST: THE COLOR WARS

JavaScript | HTML | CSS

- Accessibility-focused color contrast analyzer built to help UI and UX developers validate WCAG compliance and explore contrast relationships between colors.

Live Demo: contrastthecolorwars.netlify.app

HIGHLIGHTS

- 10+ years professional frontend development experience.
- Accessibility lead on enterprise projects.
- Built interactive experiences used by large-scale organizations.
- Strong focus on modern JavaScript ecosystems.
- Active web game development portfolio.
